Brno – Healthy City

Network of Non-Smoking Restaurants in Brno

Foundation of the Network of non-smoking restaurants in Brno was initiated by the Brno – Healthy City Office of Brno City Municipality in 2009. The purpose was to support a non-smoking environment in the city in order to respond to the repeated specialists' warnings concerning the harmful effect of smoking, including passive smoking, on our health.

These challenges have already been answered in many European countries, where necessary legislative measures were made for the protection of their residents from tobacco smoke.

For Brno inhabitants, who want spend their leisure time in a pleasant non-smoking environment, a database of restaurants and cafes was created within the Brno – Healthy City Project. Their interior spaces are completely non-smoking.

Principle of the Network of Non-Smoking Restaurants

- Internet database of non-smoking restaurants, cafes, sweet-shops and other similar facilities.
- This database offers information about services provided in particular facilities, their capacity and opening hours including a direct link to their websites.
- The database enables to search non-smoking facilities by district or by type.
- Non-smoking restaurants involved in this network are promoted on city-wide level through teaser flyers, internet and media.

Do you have a favorite non-smoking restaurant in your neighborhood?

- Please, inform the staff of this restaurant about the possibility of free registration.
- Restaurants can register to this database using a simple form at www.zdravemesto.brno.cz.
